

## PROFILE

---

Highly skilled web developer with experience in creating modern and scalable web and mobile applications. Passionate about cybersecurity with extensive knowledge in this field. Proficient in using Vue.js, jQuery, Bootstrap, Node.js (Express), PHP, Firebase, and MySQL to develop efficient and effective solutions. I have skills in C++, Python, and Flutter, and a strong understanding of version control with Git. Passionate about learning and adopting new technologies to stay up-to-date.

## EXPERIENCE

---

### Mocca Makeup

December 2022, Currently

I lead web development using Vue.js and JQuery for interactive interfaces, Bootstrap for responsive design, and have developed secure services with Node.js, PHP, Firebase, and MySQL. Additionally, I am responsible for deployment on Hostinger and the implementation of the Mercado Pago payment system, maintaining quality standards in code reviews.

*Position: Full Stack Developer*

## EDUCATION

---

### UTU - Dirección General de Educación Técnico - Profesional

March 2021, November 2022

*Academic Title: Computer Technologist, Career: Computer Science*

### IBEC Institute

May 2022, October 2022

*Title: Front-end Developer, Curso: Desarrollo de páginas web y recursos informáticos*

## FEATURED PROJECTS

---

### Lydium

I am currently developing a secure chat application in Flutter using P2P communication, which utilizes Firebase as a backend platform. This personal project is actively under development and aims to ensure the privacy and security of online conversations.
